6. Basic Data Visualization

Aim :-

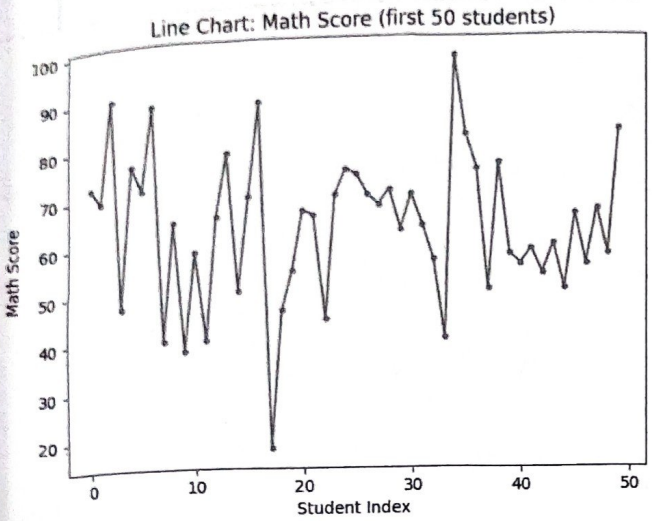

To visualize the dataset using basic plots - line chart, bar chart & histogram.

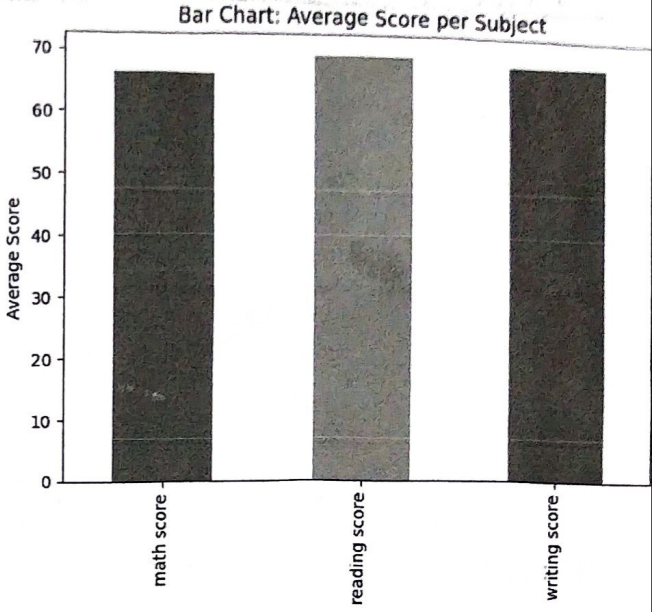

Algorithm:-

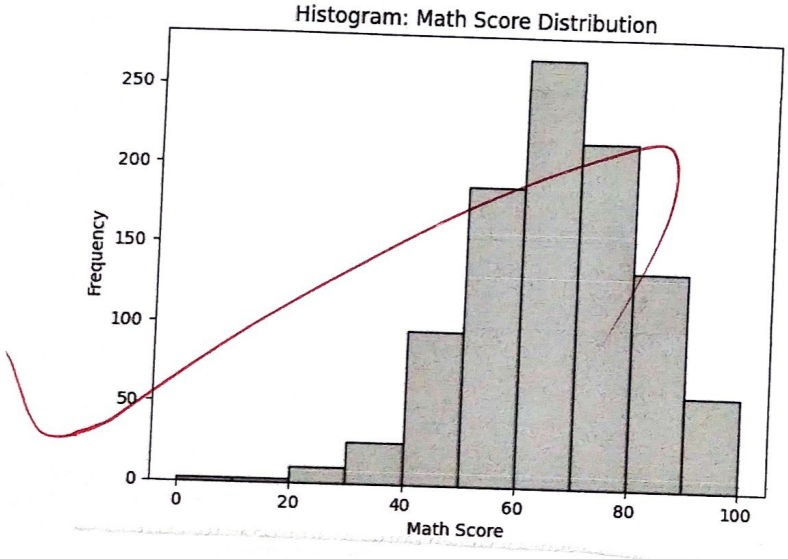

* Import pandas and matplotlib
* Load the dataset
* Plot a line chart of math scores
* Plot a bar chart of avg scores per subject
* Plot a histogram of math score distribution.

Code:-

```
import pandas as pd
import matplotlib.pyplot as plt.
plt.plot(
df = pd.read_csv("Student Performance.xls")
plt.plot(df["math score"][:50], markers='o', markersize=3)
plt.title("Line Chart: Math Score")
plt.xlabel("Student Index");
plt.ylabel("Math Score");
plt.show()
df[["mathscore","reading score","writing score"]].mean().plot(kind="bar
    color="orange")
plt.title("Bar Chart: Avg Score per Subject");
plt.ylabel("Avg Score");
plt.show()
plt.hist(df["math score"], bins=10, color="orange", edgecolor="bla
plt.title("Histogram: Math Score distribution")
plt.xlabel("Math Score");
plt.ylabel("Frequency");
plt.show()
```

16/9/26

Result:

Line chart, bar chart & histogram were generated successfully.
